

# Space Recliner

The Space Power is the next generation of Scandinavian designed, comfortable, supportive and long-lasting furniture. The Space Power recliner comes with an integrated footrest, making it more compact, as well as being motorised with a rechargeable battery. The control buttons are placed discretely under your right-hand side armrest, easily reachable and simple to operate.

## Luxurious feel

For extra comfort, we've added a layer of soft high resilient polyurethane foam with fibres for a luxurious feel.

## 'Just right' headrest

Support your head and neck in the perfect position by fine-tuning the angle of the headrest with our unique adjustable system.

## 360° Swivel

Effortlessly rotate the chair in either direction, with the peace of mind of absolute stability, thanks to our smooth 360-degree swivel mechanism.

## Cold-Cure Foam

Cushioning For lasting comfort and durability, this space-age material, encasing the recliner steel frame and springs, is moulded to create a contoured silhouette, that holds its shape for the lifetime of the foam. Ensuring better ergonomic support for your body giving comfort that lasts.

## Customise to your style

Get your perfect look by selecting from a choice of leather, fabric and wood finishes to suit your home and style
